

Part 1 — Submission index

Quick map from **assignment ask** → **your file** → **status**.

Assignment Part 1 checklist

#	What Fixxly asked for	File	Status
1.1	5 ranked reasons (first principles, no talking to team)	part-1-ranked-reasons-v4.md	✓ Ready
1.2	AI feature one-pager (not wireframe)	part-1-feature-one-pager.md	✓ Ready
1.2a	What does the AI do?	One-pager § "What the AI does"	✓
1.2b	What data does it need?	One-pager § "Data architecture"	✓
1.2c	Model / approach and why	One-pager § "Model / approach — hybrid"	✓
1.2d	Success at 30 days	One-pager § "Success at 30 days"	✓
1.3	UX sketch — 3 screens max	part-1-ux-sketch-3-screens.md	✓ Spec ready · Figma/photos optional

Supporting docs (append to PDF if useful)

File	Use in submission
bill-banayein-flow.md	Locked product flow (reference)
appendix-market-context-one-page.md	Market context appendix
market-research-fixxly-contractors.md	Deep research (optional appendix)
assignment-details.md	Original brief

One-paragraph summary for PDF cover (Part 1)

Retention diagnosis: ~40% of Week-1 contractors don't reorder within 14 days primarily because **order 2+ still goes to the hardware dealer** (#1) and the app is a **shop, not a job-start workflow** (#3)—not because contractors never need materials again. **Bill Banayein** attacks this by letting the contractor **voice or template a full client material bill**, see an honest **Fixxly vs dealer split**, add **markup**, and share a **white-label PDF** before the dealer gets the list—then one-click order Fixxly lines. Success at 30 days: **≥1.5 bills/contractor/week**, **≥45% bill→Fixxly order**, **≥50% bills shared with client**.

What you still need to do (minimal)

1. **Figma (recommended):** Recreate 3 screens from `part-1-ux-sketch-3-screens.md` wireframes
— or photograph paper sketches
 2. **Collate PDF:** Part 1.1 + 1.2 + 1.3 (+ Figma export or link) + Part 3 table
 3. **Part 2 link:** v3 prototype at `../Fixxly/` port 5180 or GitHub
-

The 5 reasons (at a glance — for slides)

1. **Next run goes to hardware dealer** (WhatsApp, credit, spec, one message)
2. **14-day metric blends job types** — overstates churn for daily-site contractors
3. **App is a shop, not job workflow** — no client bill / hisaab
4. **Next basket not findable / not stocked** — silent search exit
5. **Tail:** bad delivery, cohort noise, no purchase in window

Hero feature: Bill Banayein → attacks **#1 + #3** (+ honest split for **#4**)
