

Bill Banayein — Product flow (locked v1)

Placement: One feature on home — **not** default app flow. Browse / cart / order remain for urgent buys.

Persona: Urban mistri/plumber · 10th–12th pass · not tech-savvy · on-site · Kannada + English.

Flow

```
Login
  → Home
  → Bill Banayein

  → Select job type

  → Input mode:
    · Prebuilt template
    · Voice recording
      - Sample recording shown first ("aisa bolein")
      - Live bill builds on screen while recording

  → Edit materials + qty (+ brand optional) + add items later

  → Select site name

  → AI prices (master + fetch new) → contractor review

  → Split: Fixxly | Dealer

  → Markup

  → Preview client PDF (contractor brand only – no Fixxly)

  → Share to client

  → [One-click Order Fixxly part]
  → [WhatsApp dealer list – SKUs + qty, no prices]
```

UX rules

- One primary action per screen
 - Photos + numbers > long text
 - Kannada + English UI toggle; voice STT both
 - Client never sees Fixxly
 - Markup mandatory before client share
 - Fixxly price = exact; non-Fixxly = estimate (contractor sees; client sees sell price only)
-

Outputs

Output	Content
Client PDF	Contractor letterhead, sell prices, total
Fixxly order	In-stock lines only
Dealer WhatsApp	Site, spec, qty — no rates
