

Part 1.3 — UX sketch: Bill Banayein (3 screens)

Fixxly Head of Product · Part 1 retention feature

Pairs with: `part-1-ranked-reasons-v4.md` · `part-1-feature-one-pager.md` · `bill-banayein-flow.md`

Feature: Bill Banayein — contractor builds a **client material bill** by voice or template, sees **Fixxly vs dealer split**, adds markup, shares **white-label PDF**.

Design for: Raju Kumar, plumber, 10th pass, on-site **7:45 AM**, dusty hands, low literacy, **Kannada + English**, workers waiting nearby.

Not in scope for these 3 screens: login, home entry tile, site picker, dealer WhatsApp — implied before/after.

Why only 3 screens

The assignment caps UX at **3 screens**. These map to the **highest-friction moments** in the flow:

Screen	Job-to-be-done	Why it matters at 7:45 AM
1. Bol ke banao	Start bill without typing SKUs	Voice + template beats catalog search on site
2. Hisaab + split	Trust the numbers; see what Fixxly can deliver	Dealer wins today because contractor gets one full quote
3. Client ko bhejo	Share bill under contractor brand; act on Fixxly lines	Retention = owning the client money conversation

Global UX rules (all 3 screens)

Rule	Implementation
One primary action	One orange button per screen; secondary = text link or grey
Bilingual labels	English line + Hindi/Kannada below (never English-only walls)
Numbers > text	Prices, qty, totals in 20px+ bold ; labels in 14px
Thumb zone	Primary CTA fixed bottom, min 52px height, full width
Trust	“30 min” only on Fixxly lines; “estimate” tag on dealer/reference prices
No Fixxly on client output	Screen 3 PDF preview shows Raju Kumar Plumbing header only

Palette (match MVP): Navy `#1A2744` header · Orange `#F97316` CTA · Green Fixxly · Grey dealer · Cream background

Flow (3 screens)

Screen 1 — Bol ke banao (*Speak & build*)

Purpose: Contractor picks job type and creates the first draft of the bill **without searching the catalogue**.

Primary CTA: Aage badho → / आगे बढ़ो (enabled when ≥ 1 line in live bill)

Wireframe

Key interactions

Element	Behaviour
Sample play	Before first record: 8s audio — "Bathroom fitting... 6 elbow 4 inch, 1 solvent, 2 angle cock..."
Record button	Large red circle 64px; pulsing ring while active
Live bill strip	Updates every ~2–3s from partial STT + parse; contractor sees app "listening"
Edit [🔧]	Inline qty stepper (+/-); no keyboard for item name on this screen
Template path	Pre-fills lines for selected job type; same live strip, no mic

Copy (on-screen)

- Header: **Bill Banayein / बिल बनाएं**
- Sample hint: **Pehle sample sunein — phir boliye** / *Listen first, then speak*
- Empty bill: **Abhi kuch nahi — bolo ya template chunein**

Low-literacy choices

- Job types = **emoji + 1 word**, not paragraphs
- Voice is **first** option (template second)

- Bill lines show **trade names** contractors say, not SKU codes
- No keyboard on screen 1

Screen 2 — Hisaab + split (Review & split)

Purpose: Contractor **trusts and edits** the bill, sees **Fixxly vs dealer**, sets **markup** (required before client share).

Primary CTA: Client ko dikhayein → / क्लाइंट को दिखाएं

Wireframe

Key interactions

Element	Behaviour
Fixxly block	Green left border; tap line → qty edit; Order now badge on section
Dealer block	Grey; estimate tag on every line; tap to confirm or remove
Markup chips	0 / 8 / 12 / 15 % + custom; must select before CTA enables
Margin summary	Shows contractor cost vs client total — never shown to client
Drag between sections	Optional v2; v1: long-press → “Fixxly pe bhejo” if in stock

Copy

- Fixxly header: **Fixxly se — 30 min mein** / *From Fixxly — 30 minutes*
- Dealer header: **Dealer se — dukaan se lena** / *From dealer — pick up locally*
- Dealer prices: **≈ est. · confirm karein** / *approximate · please confirm*

Low-literacy choices

- **Colour split** (green vs grey) beats reading “fulfilment channel”
- Markup as **chips**, not percentage input field
- Margin in ₹ (fayda) — contractors think in rupees earned
- Max **5–7 lines visible** per section; scroll for more

Screen 3 — Client ko bhejo (*Share & act*)

Purpose: Preview **white-label PDF**, share with client, then **order Fixxly part** or **WhatsApp dealer list** (no prices to dealer).

Primary CTA: WhatsApp pe bhejo / व्हाट्सऐप पर भेजें

Secondary: Fixxly order karein (Fixxly lines only)

orange primary

green secondary

outline tertiary

text links

Key interactions

Action	Result
WhatsApp pe bhejo	Opens share sheet with PDF/image + pre-filled message to client
Fixxly order	Adds green-section lines to cart → checkout (30 min delivery)
Dealer ko list	WhatsApp to saved dealer: site + item spec + qty — no rates
PDF save / Print	System print dialog; contractor can save PDF locally

Copy

- PDF title: **Material hisaab / सामान का हिसाब**
- Footer on PDF: *Labour alag hoga / Labour charged separately*
- Dealer WhatsApp preview: "HSR Sector 2 — 2 angle cock chrome, 1 shower arm SS"

Low-literacy choices

- PDF looks like **handwritten estimate pad** — familiar format
- **Three actions stacked** with icons + 1 line each (not a menu)
- Fixxly button shows **item count + ₹** so contractor knows what they're ordering
- Client PDF = **sell prices only**; no cost, no Fixxly, no dealer split

Screen specs (for Figma)

Spec	Value
Frame	Android 390 × 844
Header height	56px + safe area
Bottom CTA	52px + 16px padding + safe area
Job tile	160 × 88px min
Record button	64px circle
Type scale	Label 12 · Body 14 · Price 18 · Total 22
Touch target	Min 48 × 48px

Annotations for reviewer (assignment criteria)

Assignment ask	How these 3 screens answer it
Low literacy	Emoji job tiles, voice-first, ₹ margin not %, colour-coded split
On-site	Voice + live bill; no SKU search; big tap targets
7:45 AM	Sample-before-record; template fallback; one CTA per screen
Attacks #1 reason	Intercepts dealer at client quote — full bill before dealer WhatsApp
AI visible but not chatty	Live bill strip = AI parsing feedback; not a chat bubble UI

Figma recreation checklist

- [] Screen 1: 4 job tiles, voice card with sample button, live bill strip with 2 sample lines
- [] Screen 2: Green Fixxly block (3 items), grey dealer block (2 items), markup chips at 12%
- [] Screen 3: PDF mock with Raju Kumar header (no Fixxly), 3 action buttons
- [] Component: Primary button orange, header navy, qty stepper
- [] Optional: EN | हि toggle on header (one mock per language is enough)

Alternative: paper sketch tip

If sketching on paper at 7:45 AM theme:

1. Draw **phone outline** with thick bottom button on each page
2. Use **green highlighter** for Fixxly section, **grey pencil** for dealer
3. Write **Hindi under every English label**
4. Photograph 3 pages → paste into submission PDF

Submission bundle: Part 1.1 `part-1-ranked-reasons-v4.md` · Part 1.2 `part-1-feature-one-pager.md` · Part 1.3 this file (+ Figma link or photos when ready)
